DETAILED ACTION

Specification

The abstract of the disclosure is objected to because there are inconsistencies in the specification. The first end of the elongated shaft appears to be adjacent to the outer shield. However, the specification recites that the second end is adjacent to the outer shield (page 7, lines 17-18). The floor portion of the inlet port should have a reference number. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6, it is not clear if the "the first tubular end" should be recited as the first or the second tubular end. In claim 4, line 7, it is not clear if "the first tubular end" should be recited as the first or the second end.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3764

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 3-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5-6 and 8 U.S. Patent No. 6,675,804. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims recited in the present invention are broader and similar in scope and subject matter to the claims recited in U.S. Patent No. 6,675,804.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Galleher, Greenburg, blachly, King, Bass, Ivanovich, each discloses a device for placement within a user's mouth. Although each of these references is pertinent prior art, neither was used to reject any claims, in the first office action.
